JEWISH POWER

Jews are overrepresented in nearly all professional fields in the United States, whether it be the federal government, the entertainment industry, or finance. While these statistics are often explained as being the result of a Jewish tendency toward higher education and a culture that values positions of authority, the true system that Jews use to consistently maintain overrepresentation in the U.S. is much more organized and deliberate than mere cultural norms or coincidence. There is an underlying social and political infrastructure, long built into the very core of this country, created and used by international Jewry to manipulate and control the American government and her citizens. It is through this infrastructure that Jews force the American people to believe what they want them to believe, say what they want them to say, and do what they want them to do. International Jewry has so ingrained itself within American politics and culture that it has been able to attack America repeatedly and still force her to send thousands of soldiers to die fighting *its* wars, all while facing no consequence[1]. As Russia is sanctioned by nearly every nation on Earth for its invasion of Ukraine, Israel revels in undying support from the Western world for its genocide in Gaza, captained by the Zionist-occupied American government. Ultimately, I call for the removal of all Jewish-supported politicians from the federal government, of which there are many. No individual holding both U.S. and Israeli citizenship will truly put America first, nor will any individual who has received millions of dollars from Jewish donors. The system of control the Zionists have on the American government (and the private sectors of American society) must be torn down and replaced with a truly America First regime. As American citizens, we can no longer tolerate the unprecedented amount of foreign influence currently placed on our nation. It is our duty to rise against the widespread corruption of our government and purge the inevitably harmful Jewish influence now and forever.

To begin, we must be reminded that only 2.4% of the adult U.S. population is Jewish. Despite this, Pew Research Center and the Israeli newspaper Haaretz report that 9% of the 118th Congress's Senate is Jewish, while 6% of the House of Representatives is Jewish. Thus, there are 2.5 times more Jews in the U.S. Congress than there would be if it proportionately represented all American racial groups. There are 2.5 Jews for every non-Jew in the 118th U.S. Congress. Such a ratio is completely unprecedented and unheard of by any other racial minority.

While actual Jews are already overrepresented in the American government, the number of Jewish/Zionist sympathizers in the U.S. Congress is also unacceptable. The American Israel Public Affairs Committee (AIPAC) is an Israeli foreign lobby that donates extensively to American politicians to manipulate election results and force political action in their favor. AIPAC was

[1] During the Six-Day War fought between Israel and a coalition of Arab states, the USS *Liberty* (which was stationed in international waters) was attacked by two Israeli fighter jets and three motor torpedo boats, killing 34 American servicemen and wounding 170. Survivors of the incident have repeatedly insisted that the attack was intentional, while Israel claims it was an accident. The ship was deemed too costly to repair and was sold for scrap, and Israel has faced no penalties for the attack. Over 7,000 American soldiers have died in conflicts in the Middle East (Iraq War, War in Afghanistan, etc.), and roughly $8 trillion has been spent on said conflicts. These wars, primarily fought at Israel's behest and for its benefit, have done nothing but harm the United States.

founded in 1954 to cool Israeli public relations after the Qibya Massacre[2] in October 1953. In 1962, the American Zionist Council (a collective of Zionist organizations in the United States, one of which is AIPAC) was ordered to register as a foreign agent by President John F. Kennedy and Attorney General Robert F. Kennedy, which it did not do. The President was assassinated a year later, and to this day, AIPAC enjoys the privileges of being registered as an American agent, which all other foreign lobbies do not. AIPAC controls several smaller organizations, such as AIPAC-PAC (American Israel Public Affairs Committee - Political Action Committee) and the United Democracy Project (UDP), through which it makes large donations to state and federal political campaigns.

According to AIPAC's own records, 389 of the 469 congressional seats up for reelection in 2024 were supported by funds from AIPAC. That is, 83% of campaigns (both Republican and Democratic) in the 2024 legislative election received donations directly from the Israeli lobby. The total sum of AIPAC's 2024 campaign contributions is $51.8 million. This does not include other organizations, such as the UDP, but only donations directly associated with AIPAC. 389 out of all 535 current members of the U.S. federal government have received funding from AIPAC in at least one campaign. That is 73%. AIPAC claims that 98% of candidates supported by the Israeli lobby won their respective elections. British newspaper *The Guardian* reports that only 33 Senators did *not* receive funding from AIPAC or AIPAC-affiliated lobbies, meaning that 94% of Senators are supported by the Israeli lobby.

AIPAC boasts donations from individuals as important and varied as Jan Koum (co-founder of WhatsApp), Miriam Adelson (widow of Sheldon Adelson; owner of Las Vegas Sands), and Jonathan Gray (President of Blackstone Group, world's largest private equity firm). Additionally, Leonid Radvinsky, the Jewish owner of OnlyFans (a site used primarily for the distribution of pornography), pledges to donate $11 million to AIPAC.

This encourages us to discover the incredible overrepresentation of Jews in the class of the super-wealthy. Pew Research Center and Forbes estimate that 20-30% of millionaires in the United States (overrepresentation by a factor of around 10 times) and 1.7% of millionaires in the world (overrepresentation by a factor of around 8 times) are Jewish. Roughly one-third of billionaires in the United States (overrepresentation by a factor of around 13 times) and 20% of billionaires in the world (overrepresentation by a factor of around 100 times) are Jewish. Such numbers are unheard of from any other minority groups. Any given member of this minute group that comprises only 0.2% of the world's population is more likely to be a billionaire than any non-member by a factor of 100 times. There are twice as many Jews as non-Jews in the U.S. government. 98% of political candidates chosen by the Jewish lobby won their respective elections. It is impossible to deny that a foreign group is occupying the United States, and it is impossible to deny that many institutions in the

[2] In October 1953, Israeli border conflicts with its Arab neighbor, Jordan, reached their peak with the Qibya Massacre. Qibya was a village 20 miles northwest of Jerusalem, roughly a mile and a half from the Israel-Jordan border. A truce had been established between the two nations to keep peace in the region. As such, Qibya was scantily protected (only 30 Jordanian national guardsmen were present in the village). Despite the truce, 600 Israeli soldiers crossed the border at 9:30 PM on October 14, 1953. Over two hours, the Israeli battalion (aided by artillery) opened fire on the village. Once the Israeli forces ran out of artillery ammo, they entered the town armed with rifles and Sten guns. They killed every man, woman, and child they came across, and killed all the cattle in the village. They dynamited 42 houses, a school, and a mosque. Around 3 AM, the battalion left. Roughly 69 villagers were killed, two-thirds of whom were women and children. Initially, Israel denied that the Israel Defense Forces were involved in the massacre. To this day, neither the State of Israel nor any individual present at the massacre has faced a penalty for their actions. Ariel Sharon, who led the raiding battalion, would later become Prime Minister of the State of Israel.

United States have been hijacked to benefit foreign interests. Such a thing must be fought against and must be stopped.

Not only is Jewish influence in politics and business enormous, but the Jewish grip on finance is also unprecedented. 5 out of the 16 Chairs of the Federal Reserve were Jewish (31.25%; overrepresentation by a factor of 13 times). To better understand the scope of the Jewish influence over the Federal Reserve, a brief history shall be presented.

In November 1910, Senate Republican leader Nelson Aldrich, then head of the bipartisan National Monetary Commission, met with five prominent members of the New York banking community to discuss the establishment of a central bank for the United States. The meeting was held in secret off the coast of Georgia on Jekyll Island, and none of the attendants would admit its occurrence until the 1930s. Regardless, the six men assembled there would lay the foundations for the coming Federal Reserve. The five bankers present were:

1. A. Piatt Andrew: the irreligious and likely homosexual Assistant Secretary of the Treasury
2. Henry Davison: the ethnically Jewish, religiously Presbyterian senior partner at J.P. Morgan & Co.[3]
3. Arthur Shelton: Aldrich's private secretary
4. Frank Vanderlip: Irreligious Jewish sympathizer and President of the National City Bank of New York
5. Paul Warburg: the Jewish partner at investment banking firm Kuhn, Loeb & Co.

The meeting was provoked by the Panic of 1907, one of many frequent financial panics that occurred in the United States due to the lack of an organized banking system. In Warburg's words, the United States' financial system was "at about the same point that had been reached by Europe at the time of the Medicis, and by Asia, in all likelihood, at the time of Hammurabi."

The group decided that they desired to establish an elastic currency supplied by a bank that held the reserves of *all* banks, and from this definition, the structure of the Federal Reserve was decided upon. In this system, the Federal Reserve of the United States would be split into fifteen geographical portions, all governed by a board of directors elected by the member banks in its respective district, with larger banks getting more votes, thus promising control over the central bank to the largest banking institutions in the United States, many of which were controlled by or adjacent to the Zionist Rothschild banking family.

In January 1911, Nelson Aldrich presented the plan for an American central bank to the National Monetary Commission without detailing its origin. A year later, it would be sent to Congress and passed as the Federal Reserve Act in December 1913.

The Federal Reserve was deliberately designed in a way that allowed the largest banking institutions (and thus the Zionist Rothschild and Rothschild-adjacent banks) to control the economy of the United States. As the United States continued to grow in power and influence, controlling the American economy meant controlling the world's.

Jewish power goes beyond control of America's government and banks. It also has an incredible influence over the culture of America, and by extension, the entire Western world. This

---

[3] J.P. Morgan & Co. and the Jewish Rothschild banking family had a developed relationship. In 1893, they collaborated in a bailout of the U.S. Treasury. They also frequently collaborated in the opening of branches across America throughout the 20th century. Henry Davison's presence at the Jekyll Island meeting represents the National Monetary Commission's (and thus the Federal Reserve's) conflict of interest, prioritizing actions that benefit large, Jewish Zionist banks (such as J.P. Morgan & Co. and the Rothschild banking system) over the good of the American public.

control is achieved by the repeated hijacking of American cultural institutions, whether it be colleges and universities, the entertainment industry, or the mass media.

All eight Ivy League universities have received donations from independent Jewish donors (such as Leslie Wexner, Ronald Lauder, Len Blavatnik, and Mortimer Zuckerman), from Jewish organizations such as the Wexner Foundation, or from both. Jews are more likely to be accepted into Ivy League universities, with 20-35% of Ivy League alumni being Jewish despite composing 2% of the U.S. population (overrepresentation by a factor of around 13 times). Anti-Zionist protests taking place on Ivy League campuses have been repeatedly and forcefully suppressed. Harvard University, for example, was sued twice in 2024 for antisemitism by Jewish students and organizations. In 2025, Harvard University was accused of violating Title VI of the Civil Rights Act by the U.S. Department of Health and Human Services due to repeated anti-Zionist protests on campus. It is undeniably clear that Ivy League universities are controlled by their donors (i.e., Zionist Jews) in a perfect replica of the Jewish control of government (AIPAC). Ultimately, by suppressing anti-Zionist sentiment in America's youth, Jewry seeks to eliminate anti-Zionism not just at the current time, but for the future as well. Jewry has used the legal system to deliberately attack freedom of speech in the center of America's intelligent youth to stamp out any opponents of Zionist control and manipulation.

Jewish overrepresentation continues even further, however, into the world of media. Of the leaders of the 10-12 major news outlets in the United States, 30-40% are Jewish (overrepresentation by around a factor of 15 times). The outlets owned by Jews include ABC News[4], CBS News[5], NBC News/MSNBC[6], CNN[7], and Bloomberg News[8]. Combined, these platforms see roughly 15.71 million streams per day. Jewish-controlled media outlets, thus, influence nearly 16 million people every day despite composing only 2.4% of the population. This is simply unacceptable. The vast majority of the material we consume, whether it be news reports, television, or music, has in some way been

---

[4] ABC News is a subsidiary of the parent company Disney. The CEO of Disney is Bob Iger, a pro-Israel Jew who has donated at least $2 million to the Israeli genocide of Palestinians.

[5] CBS News is a subsidiary of the parent company Paramount Global. The pro-Israel Jewish Redstone family has controlled Paramount Global, CBS Corporation, Viacom, and the now-defunct National Amusements.

[6] NBC News and MSNBC are subsidiaries of the parent company Comcast. The CEO of Comcast is Brian L. Roberts, a Jew who has personally donated a combined $160,900 to both Democratic and Republican political candidates.

[7] CNN is a subsidiary of the parent company Warner Bros. Discovery. The CEO of Warner Bros. Discovery is David Zaslav, an outspoken Zionist Jew who helped develop and launch CNBC and MSNBC before becoming the CEO of Discovery, Inc., which later merged with WarnerMedia in 2022. Zaslav has personally donated $245,600 to both Democratic and Republican political candidates.

[8] Bloomberg News is controlled by Bloomberg LP. The CEO of Bloomberg LP is Michael Bloomberg, the Jewish former Mayor of New York City. Bloomberg has affiliated with both Republican and Democratic parties and has run as an independent candidate. Bloomberg supports abortion, same-sex marriage, and illegal immigration. He supported the Iraq War and the use of government surveillance following the 9/11 attacks. He has donated over $100 million to political campaigns of both parties. He has donated at least $25 million to the Israeli genocide of Palestinians. His personal wealth is managed by Willett Advisors LLC, which is run by Steven Rattner, also a Zionist Jew.

influenced by Jewish priorities. We have all been pushed the ideas of the Jews since childhood, indoctrinated to be obedient goyim[9] to fulfill the wills of our Zionist occupied government. Jews are overrepresented in every facet of the media, not only in news outlets. Their reach extends to the music industry, publishing houses, and Hollywood. One could spend thousands of pages simply listing the names of every Jew somehow involved in the design and perpetration of mass media. Their overrepresentation in the creation of our media and the subsequent Jewish-benefitting content we consume has greatly shaped the current behavior of our society. From feminism to wokeism, Christian Zionism to the Holocaust narrative, neoconservatism to pro-immigration[10], every major concept pushed by the mass media has been touched, if not completely designed, by the Jews. Our entire culture has been carefully shaped and manipulated to benefit the interests of Zionist Jews rather than White Americans. Once more, it must be said: this is unacceptable.

Jewish power overwhelms us in all parts of our lives. It is used to determine the policies our government passes, to control our banking and education systems, and to manipulate our media into pushing pro-Jewish content. The methods by which Jews can maintain their power are, in fact, quite simple.

To put it bluntly, Jews are more loyal to other Jews than they are to goyim. The system of Jewish control is maintained because of a sense of tribal loyalty held between Jews that is not present in the white population. While Jews are willing to do "favors" to benefit other Jews, white people are not willing to do the same for other white people. As long as we have such racial infighting, there is no possibility of us escaping the bonds of a much more organized, intelligent, and unified enemy. The structure of Jewish power is not maintained by a hyper-organized, international "Jewish conspiracy". It is maintained by the simple fact that Jews help Jews while whites do not help whites. A Jewish person is more likely to hire a Jew than someone of a different race. A white person is more likely to hire a person of a different race than another white person.

By this, Jews can form industrial dynasties in which a lineage of Jews rules the same industries, kept in place by the Jews themselves. The existence of Israel only makes this easier. Now, there is a true "center of operations" for Jewish affairs. They have representation in non-government and inter-government organizations, they have a military, they have a nuclear program, and they have a streamlined way to earn money. Israel is not the problem. Jews are the problem. The existence of Israel only makes it easier for Jewish power to be maintained, but it is not the source of it. It is the opinion of some foolish individuals that Jews are "one of us". They are not. They are a distinct category, and they see themselves as such. They are loyal to themselves, not to their country of origin. Now, the majority of Jews are more loyal to Israel than to their country of origin. They are not one of us, and we must stop treating them as if they are. There is no such thing as Judeo-Christian values. There is no such thing as "Western society" in which Jews are a vital part. Their intense influence over the internal affairs of the United States must be stopped. All who are more loyal to another nation than the nation whose people they represent in government (most of whom are AIPAC-supported Zionists) must immediately be ousted and replaced by truly America First

---

[9] *Goyim* is the term used by Jews to refer to non-Jews, often in a derogatory manner. White nationalists have since repurposed the term to refer to non-Jews who bend the knee for the benefit of the Zionist occupied government.

[10] The fact that some of the listed ideologies contradict others does not discredit the fact that they are all formulated and distributed by Zionist Jews. In fact, pushing contradictory narratives greatly benefits Jewish interests in that it creates division within the United States, allowing Israel to quietly benefit from taxpayer dollars while American citizens fight other American citizens over arbitrary and unimportant concepts.

politicians who can be trusted to protect, maintain, and establish policies that are best for the people of America, not for the people of a foreign nation.
